Easy fixing of dowel and satellite.

Simply click the cable clamp on to the satellite, either on the wall or ceiling.

Easy opening and closing and repeated opening to insert or refill cables.

Cable holders can be connected to each other, all sizes can be used, such as KKS 20 or KKS 40.

To be connected with each other on the wall or on the ceiling, back to back and/or one below the other.

This ensures that different cables such as data and electrical power cables do not get mixed.
